

Exploring Contributions of J. G. Carrasco Ramirez: A Focus on Strategic Planning, Management, and Small Business Sustainability

Ridwan Rahman

Lecturer and Researcher in Cultural Heritage, Welfare, AI and Economic, Jawa, Jawa Barat, Indonesia

Abstract

J.G.Carrasco Ramirez, an international lawyer specializing in Strategic Planning, AI, Information Architectures, and Machine Learning, has made notable contributions to academic research, particularly in management and small business domains. Based in the USA, Carrasco Ramirez's work has been featured in esteemed academic journals, with a recent focus on analyzing the CR model from a planning perspective. This paper aims to provide an extensive overview of Carrasco Ramirez's academic endeavors, with a primary emphasis on his latest research from 2023, offering insights into the impact of his work on strategic planning. Over the past five years, Carrasco Ramirez has published extensively in renowned international journals, covering topics such as Information Architecture, Artificial Intelligence, Machine Learning, and applications in various sectors, including healthcare and small business management. Carrasco Ramirez's diverse research interests demonstrate his commitment to exploring cutting-edge topics and their practical implications.

Keywords: Carrasco Ramirez; CR Model; AI

JEL classification: A10, A33

1. Introduction

In addition to being an international lawyer with expertise in Strategic Planning, AI, Information Architectures, and Machine Learning, J.G.Carrasco Ramirez has distinguished himself through his contributions to academic research, particularly in the fields of management and small businesses. Currently based in the USA, Carrasco Ramirez has gained attention for his numerous high-quality research articles published across various prestigious academic journals. Of particular interest is Carrasco Ramirez's recent work, which provides insight into the analysis of the CR model from a planning perspective.

This latest research paper signifies a continuation of Carrasco Ramirez's commitment to providing insightful contributions to the academic community, offering a fresh perspective on strategic planning through the so-called CR model.

This review article seeks to provide a comprehensive overview of Carrasco Ramirez's academic publishing work and achievements, with a primary focus on his latest works from 2023. By examining Carrasco Ramirez's research output in depth, readers may gain a deeper understanding of his scholarly contributions and the impact of his work on the fields of management, small business, and strategic planning (Google Scholar, 2023).

2. General Overview of Ramirez's Work

In the span of the last five years, author J.G. Carrasco Ramirez has published in several international journals such as Journal of Knowledge Learning and Science Technology, International Journal of Culture and Education, Journal of Artificial Intelligence General science, and International Journal of Responsible Artificial Intelligence. The main focus of the research papers was according to the keywords analysis:

- Information Architecture, and Artificial Intelligence in Business and Practical Scenarios,
- Real-World applications of knowledge,
- Machine Learning,
- Small-sized business,
- AI in Healthcare, and development,
- CR Model and Systematic Approach to the CR Model.

Despite his profound expertise in the fields of AI, Information Architectures, and Machine Learning, Carrasco Ramirez's field of expertise extends far beyond the field of strategic planning and organizational behavior. As a highly educated researcher and lawyer, Ramirez demonstrates a multifaceted approach to academic fields not limited to contemporary and pressing topics that transcend traditional disciplinary boundaries.

3. Review of Latest Work

In his latest research conducted in 2023, Carrasco Ramirez underscores the significance of long-term sustainability within the field of strategic management theories; also, in addition to emphasizing the importance of enhanced communication, flexibility, and performance management, Carrasco Ramirez further advocates for the inclusion of talent management as a crucial component within the framework of systematic model planning (Carrasco Ramirez, 2023).

In his 2023 study, Carrasco Ramirez further investigates that the strength of the model resides in its adept capacity to synchronize and integrate interconnected dimensions within organizational structures; these dimensions span across cultural, economic, and operational fields, fostering a comprehensive grasp that facilitates well-informed decision-making amidst the dynamic nature of the business landscape. Guided by principles of systems thinking, this holistic approach enables organizations to navigate complexities with precision and deliver appropriate planned results.

Central to the model is the Integration Nexus, which occupies a pivotal position. Here, scientific principles pertaining to adaptability and continuous feedback mechanisms converge synergistically; it also serves as a focal point for strategic alignment and

integration efforts, empowering organizations to effectively navigate challenges and capitalize on opportunities in a rapidly evolving environment.

Similarly, in his other works, Carrasco Ramirez (2022) focuses on business-management models and small businesses; e.g., by profound analysis of failing tendencies of small businesses in the USA and found out that there were presents several themes necessary for better sustainability of small businesses (Carrasco Ramirez, 2022):

- Effective Marketing in US Small Businesses
- Effective Cash Flows in US Small Businesses,
- Adoption of Innovation and Technology in US Small Businesses,
- Effective Formation of an Initial Business Plan.

Returning to the extensive research article titled "A Comprehensive Exploration of the CR Model: A Systemic Approach to Strategic Planning," authored by J.G.Carrasco Ramirez in 2023 and published in the International Journal of Culture and Education (IJCAE), significant insights into the dynamics of strategic planning emerge; this academic research represents examination of the CR model, expressing its role as a systemic framework in guiding strategic decision-making processes within various organizational contexts.

In this research, Carrasco Ramirez provided an in-depth introduction of the topic and methodology with objectives, particularly focused on theoretical foundations, literature synthesis, model description, elementary exploration, and practical ability. This shows Ramirez's ability to analyze individual components of introduction and provide precise information regarding the topic.

Literature review furthermore consists of systems theory, strategic planning theory, organizational culture and management, and further topics which are necessary for further reading and understanding of the CR Model and Strategic Planning Approach.

Carrasco Rarmiez put a lot of effort into Model Description in which he also provides two visual figures for better understanding; and furthermore describes individual elements of the model which are organizational side, economic side, operation side, an integration nexus, and such as.

The same is done for the Systematic model of strategic planning within the integrated framework in which Carrasco Ramirez further describes organizational side elements such as culture and values, internal structure, and human resources, but also economic side elements such as market dynamics, and competitive forces.

Carrasco Ramirez's efforts lay a profound groundwork for articulating the central concept known as the Planning Heart; he describes it as a visual metaphor encapsulating the hierarchical significance and seamless integration of Operating Plans positioned at the apex and Strategic Objectives at the core within the Systemic Model.

This depiction serves to underscore the essential role played by both components and emphasizes their interconnectedness within the broader framework of strategic planning.

Through this visualization, Carrasco Ramirez effectively communicates the pivotal nature of aligning operational tactics with overarching strategic goals, thereby enhancing the overall effectiveness of organizational decision-making processes within the Systemic Model.

This is confirmed by previous similar research by authors Vrba and Huynh (2023) who focused on small-sized businesses in their book titled “Modern Small-Sized Social Business”; and also empathized essential role of certain components however in the setting of social businesses while Carrasco Ramirez focuses much more on general small businesses.

In relation to Carrasco Ramirez’s research (2023) however there may be different research questions that shall be investigated in the author’s future research; such as research questions include for instance:

- Key components of the Systemic Model of Strategic Planning and their relations to small sized businesses;
- How does the Systemic Model differ from conventional approaches to strategic planning, and how shall it be further developed for the near future;
- What are the theoretical foundations and practical applicability of the Systemic Model in the current situation?

4. Conclusion

In conclusion, J.G.Carrasco Ramirez's scholarly contributions represent a significant advancement in the fields of strategic planning, management, and small business sustainability. Through a comprehensive review of Carrasco Ramirez's latest works, it becomes evident that his expertise extends beyond traditional disciplinary boundaries, encompassing a diverse array of topics ranging from AI and Information Architectures to strategic management theories.

Carrasco Ramirez's research methodology, as exemplified in his 2023 study, focuses on the CR model and its role in guiding strategic decision-making processes within organizational contexts. The integration of theoretical frameworks, literature synthesis, and practical insights underscores Carrasco Ramirez's commitment to providing valuable contributions to the academic community.

Moreover, Carrasco Ramirez's emphasis on long-term sustainability and talent management highlights the importance of holistic approaches in addressing contemporary challenges. The visualization of the "Planning Heart" concept further enhances understanding of the interconnectedness between operational tactics and strategic objectives within the Systemic Model, ultimately empowering organizations to make informed decisions and navigate complexities with precision.

Overall, Carrasco Ramirez's research serves as a positive example and basic guide for scholars and practitioners alike, emphasizing efforts toward effective strategic planning and organizational resilience in this evolving landscape.
